Total score: 18 points.	Achieved score:

I. Reading comprehension**a. Read the text.**Green sea turtles

Green sea turtles are big. These turtles live in the coastline of Australia, Costa Rica and of other 78 countries. They live underwater, where they can rest quietly for five hours at a time before coming up for air. The first years they eat plankton. When they are older, they eat sea grass. Baby sea turtles are in danger. Animals such as birds, crabs, and raccoons can easily attack them when green sea turtles move slowly from their nests out to the sea. Adult green sea turtles have a lot of problems. Human beings and pollution affect them seriously.
